## **DETAILED ACTION**

Claims 1, 4-9 and 12-16 are allowed.

### **Response to Arguments**

I. Applicant's arguments (see Appeal Brief filed 5/16/2007 and Reply Brief filed 8/28/2008) with respect to Claims 1, 4-9 and 12-16 have been fully considered and are persuasive. The rejections of the pending claims have therefore been withdrawn.

### **Reasons for Allowance**

The following is an examiner's statement of reasons for allowance

II. Based on the Reversed decision render by the BPAI on 6/4/2010, the prior art of record fails to teach or suggest all of the limitations of: *"A multi-protocol adapter for communicating with one or more remote computers over any one of a plurality of protocols, the adapter comprising: an integrated CPU having an embedded operating system, said operating system including software interface modules and device drivers for one or more of interrogating, monitoring, retrieving data, downloading data, recording data, revising data and performing diagnostics over any one of the plurality of protocols, wherein the operating is capable of simultaneously communicating with the one or more computers running different protocols; and a plurality of daughter board interface slots for accepting at least one daughter board interface modules for expanding*

Art Unit: 2444

*the protocol of the multi-protocol adapter” as cited in the independent claim 1 and “A multi-protocol adapter for communicating with one or more remote computers over any one of a plurality of protocols, the adapter comprising: an integrated CPU having an embedded operating system, said operating system including software interface modules and device drivers for one or more of interrogating, monitoring, retrieving data, downloading data, recording data, revising data and performing diagnostics over any one of the plurality of protocols, wherein the operating is capable of simultaneously communicating with the one or more computers running different protocols; the CPU having simultaneous interaction between at least one multiple device using multiple protocols; at least one daughter board having interconnect slots; an interface for interconnection of the at least one daughterboard; a serial port for diagnostics and system maintenance; a flash socket for storage of system software; a slot for connection of a peripheral; a socket for connection of RAM; an interface for connection of system RAM; an interface for connection of mass-storage devices; a battery for clock and configuration memory backup; an infrared serial interface; and a piezoelectric speaker” as cited in the independent claim 4.*

A review of claims 1, 4-9 and 12-16 in view of the Applicant’s arguments in the Appeal Brief filed 5/16/2007 and Reply Brief filed 8/28/2008 and the BPAI decision rendered on 6/4/2010 indicates that claims 1, 4-9 and 12-16 are therefore allowable over the prior art of record.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2444

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
